

## MEET ALAN, 29

- First symptoms appeared at 17 years
- Diagnosed at 21
- Treated at his Community Mental Health Centre
- Qualifies for Medicare but still can't afford injections
- Takes tablets to manage his condition

Like most patients, Alan's symptoms vary constantly. Because of this, he finds it hard to hold down a job.

Alan wants to stop relapsing and stabilize his life. To accomplish this, he needs a flexible and cost-effective way to titrate his medication.

## MEET JANE, 32

### Jane has Schizophrenia

- A busy mother of two young children
- Has a demanding job
- Receives injections every three months, but sometimes her condition gets the better of her.

Sometimes she feels anxious. Sometimes she feels depressed.

Like many patients, Jane feels she needs more help with coping.

## Paliflex OAD™

### Breakable Once Daily Paliperidone Tablets for Simple Titration

Schizophrenia (SZA) disrupts more than 20 million lives, at a cost of over \$300Bn in the US alone.

Antipsychotic medicines are the proven solution, with tablets and long-acting injections available. Paliperidone, a second-generation antipsychotic, is the treatment of choice for many patients who will take the drug throughout their lives.

Despite this, relapse is common, occurring in **74% of patients after 18 months**. And the effects of relapse on patients and their loved ones are devastating.

**Tablets:** Because symptoms and side effects vary, there are tablet strengths available from 1.5mg to 12mg. Physicians can adjust dosing on a weekly basis - but multiple prescriptions must be filled, and trips to the pharmacy means a barrier to adherence - and an increased risk of relapse.

**Long-Acting Injections:** Despite revolutionizing treatment, the fixed dose they provide cannot react to changing symptoms.

### PALIFLEX TABLETS provide the answer

### Just 2 breakable PaliFlex tablets provide 7 flexible dosing options

This simplifies dosage changes for people like Alan, providing the cost-effective control he needs.

For Jane, one prescription is enough to even out the peaks and troughs her injection can't.

Paliflex provides the precise flexibility and control physicians are seeking for their patients - quickly, easily **and affordably**.

#### Altus will enable

Tech transfer to partner's facilities pre-registration studies for greater cost-effectiveness and affordability.

#### Altus is seeking

Regional co-development partners and licensees for registration in Latin America, N. America, Europe (Spain/Germany) and APAC.
